

Distribution Management System

The Distribution Management System (DMS) is a comprehensive solution for managing the distribution and tracking of orders, according to a periodic order schedule; managing your product guide/catalogue; deploying the schedule forecast for Original Equipment Manufacturer; issuing purchase orders; scheduling orders; creating/updating orders, shipments and order acceptance at different levels; cancelling orders; tracking orders and invoicing. DMS provides quick and advanced search options for each distribution process required by Telrepcoc Inc. in the USA. A summary report view can be obtained for pending orders, processed orders, accepted orders, pending invoices and processed invoices. The detailed report view is given against each summary, which can be downloaded in Excel format.

Key Benefits

- ✓ Web Enabled, Anywhere, anytime access to information
