

Global Resource Management System

Standard Merit partnered with Integral Fusion in developing and installing a Global Resource Management System (GRMS) with the objective of ensuring fast-track management of its multiple projects and providing high-quality products to its clients at affordable prices. GRMS also integrates databases, applications, interfaces, tools, clients and business partners. The development effort for this project entailed some 1584 man days.

GRMS holds a number of tangible, as well as intangible benefits. The system organises information and automates processes across the entire enterprise. It builds flexibility and control into every facet of the business environment, and increases the quality and visibility of information to ensure more profitable decision-making.

GRMS is an online platform built for Standard Merit's business partners (retailers/distributors, wholesalers), Original Equipment Manufacturer and clients to effectively manage business operations related to order processing and distribution, packing and shipment, order tracking, inventory management and invoice generation. GRMS handles complete web application administration and security for each associated user entity, according to his or her defined role and authorisation. Clients can go online for product warranty registration, requests for information and online support with a live-chat feature.

Key Benefits

- ✓ Web Enabled, Anywhere, anytime access to information
- ✓ Low Cost of Information Exchange
- ✓ Integrated Business Processes across multiple locations and users onto a single enterprise-wide information system
- ✓ Huge Reduction in Data collation time for Critical Business Processes
- ✓ Dynamic Planning & Informed Decision Making
- ✓ Elimination of Re-work in generating/translating Business Reports
- ✓ Better and Faster executions of processes such as shop order handling, dynamic inventory status and order status analysis

Technology

- ✓ Microsoft Development Platform: C#, ASP.Net Framework 2.0, AJAX, Java script, , MS-IIS 6.0
- ✓ Database: MS SQL Server 2000
- ✓ Microsoft Documentation Platform: MS Projects, MS Word, MS Excel
- ✓ Adobe Designing Tools: Corel Draw, Photoshop CS2, Macromedia Dreamweaver
